

Testing, Adjusting, and Balancing for the 21st century

TESTING, ADJUSTING AND BALANCING BUREAU
"THE PROFESSIONAL'S CHOICE"

Who is TABB?

TABB is an organization made up of heating, ventilating and air conditioning (HVAC) industry professionals, including:

- Engineers with membership in the American society of Heating, Refrigeration, and Air Conditioning Engineers (ASHRAE);
- Contractors from the Sheet Metal and Air Conditioning Contractors' National Association (SMACNA); and
- Labor representatives and training facilities from the Sheet Metal Workers' International Association (SMWIA).

What is TABB Certification?

The aim of TABB's certification standards is to ensure that TABB Certified Technicians, Supervisors and Contractors are competent, reliable and qualified professionals.

Why TABB Certification?

TABB is the first certification program to synchronize all components of the complex HVAC industry and is recognized as a first rate testing, adjusting, and balancing program that assures building owners and managers their HVAC systems meet the designs specifications, are energy efficient, and aid in providing good indoor air quality.

With ANSI accreditation, TABB enhances its reputation as a leading resource for certification in the HVAC industry. Unlike other organizations whose current certification programs are ineligible for ANSI accreditation, such as AABC and NEBB, TABB Certification standards and procedures for certification are set by a policy-making body – the International Certification Board (ICB) of NEMIC, with SMWIA as the training arm, and the International Training Institute as the testing body, and TABB as the certification body.

*Changing the way you think about
test and balance companies!*

What services does ASAP Provide?

- ◆ TABB Certified Air and Water Balance
- ◆ TABB Certified HVAC Commissioning
- ◆ TABB Certified Sound and Vibration
- ◆ Indoor Air Quality Audits
- ◆ HVAC Life Safety Testing
- ◆ Duct Leak Testing

Who is ASAP?

Arizona System Analysis Professionals, LLC (ASAP) is an owner operated licensed mechanical contractor specializing in the testing, adjusting and balancing of environmental systems. ASAP is managed by two highly experienced individuals in Mr. James P. Blackmore and Mr. Steven P. McKinney. Together, both managers bring over 46 years of HVAC experience to each project.

Where has ASAP completed projects?

ASAP has completed projects at Freescale Semiconductor, Tempe and Chandler; Marvell Semiconductor, Chandler; ON Semiconductor, Phoenix; Honeywell, Tempe; Arizona State University, Tempe; Maryvale High School, Phoenix; Metro Tech High School, Phoenix; Cash Elementary School, Laveen; Laveen Elementary School, Laveen; The Apothecary Shop, Scottsdale; Optima Camelview Village; Scottsdale; Santa Rosa Boarding School, Sells; and more.

What qualifications or certifications does ASAP have?

Both managers are Testing, Adjusting, and Balancing Bureau (TABB) certified Technicians, Mr. McKinney obtaining certification in 1997 at the Denver, CO International Training Institute laboratory and Mr. Blackmore obtaining his in 2002 at the Los Angeles, CA International Training Institute laboratory. In addition, both also certified as HVAC Commissioning Supervisors and Sound and Vibration Engineers in 2007. Mr. McKinney was certified as a TABB testing, adjusting and balancing Supervisor in 2005. Mr. McKinney has also been the TAB instructor for the Local 359 Joint Apprenticeship Training Committee (JATC) for the last seven years.

TABB standards require that the person running any TABB project, be an experienced, certified TABB Technician!
